

Free Genetic Support Services for New England Physicians

Mark Korson, M.D.
**Director of Physician
Support Services**

Through an exclusive arrangement between the New England Regional Genetics Network (NERGN) and VMP Genetics, physicians in New England can access free consults with a biochemical (metabolic) geneticist via a secure telehealth platform. This will enable primary care providers and specialists, who would otherwise have little or no access to biochemical geneticists, to get the specialized opinions and management advice necessary to diagnose and treat their patients with complex genetic metabolic disorders. This kind of clinical support also provides coverage during genetics faculty absences or while clinical positions remain unfilled. The service is provided through VMP Genetics by Dr. Mark Korson, former Metabolism Service Director at both Boston Children's Hospital and Tufts Medical Center, and co-director of the North American Metabolic Academy.

This critical support, provided at no cost to the practice or patient, is only available for a limited time, so be sure to connect with us soon!

Services Available

Consultations include any combination of the following services, as appropriate.

- A metabolically-oriented discussion of the case, focusing on the issues of concern
- A review of causes for the issue(s) under review when the diagnosis is known.
- A differential diagnosis when the diagnosis is uncertain (prioritizing treatable and more common disorders).
- Provide guidelines for the assessment of a patient with a documented or suspected inborn error.
- A written and documented plan for follow-up based on the testing and treatment recommendations and strategy.
- A treatment plan, including acute interventions and stepwise management
- Advice on the latest advances: treatments, testing, protocols
- 24/7 Support!

To Request these Services: Contact Dr. Mark Korson, at mkorson@vmpgenetics.com. Want to speak to a client about the benefits of telehealth consulting? Just ask!

VMP Genetics

Established in 2001 by Dr. Fran Kendall who continues as the CEO and Director of VMP Genetics' Direct Patient Care division. VMP Genetics pioneered telemedicine within the field before there was a name for it and continues to provide remote consults to patients across the globe. www.vmpgenetics.com

New England Regional Genetics Network

The mission of the New England Regional Genetics Network (NERGN) is to promote and improve health and social well-being of those with inherited conditions through collaborations among public health professionals, private health professionals, educators, consumers, and advocates in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut. www.negenetics.org

This project is supported by the Health Resources and Services Administration of the U.S. Department of Health & Human Services (HHS under grant number UH7MC30778; New England Regional Genetics Network; total award amount 1.5 million; 100% from governmental sources. This information or content and conclusions are those of the author and should not be construed as the official position or policy of, nor should any endorsements be inferred by HRSA, HHS or the U.S. Government.
