

**Always Unique, Totally Interesting, Sometimes Mysterious:
Pediatric Genetic Testing and Behavioral Health in the Setting of Autism**
SAVE THE DATE! March 5, 2018 from 2–3:30 p.m. EST

Register Now for a 90-minute Videoconferencing Session

In partnership with the Weitzman Institute, the New England Regional Genetics Network is excited to announce a special Weitzman ECHO Complex Integrated Pediatrics session to help providers and care teams to understand the importance of genetics in autism spectrum disorders.

Weitzman ECHO® Complex Integrated Pediatrics

After participating in this session, participants will be able to:

-  **Identify the most common syndromes associated with autism spectrum disorders.**
-  **Discuss the findings on a physical exam that indicate a specific genetic disorder may be the cause.**
-  **Understand the general genetic testing that is recommended in the genetic work-up of autism when a specific syndrome or condition is not apparent.**

About Weitzman ECHO Complex Integrated Pediatrics

Weitzman ECHO Complex Integrated Pediatrics is a 9-month program that uses twice monthly videoconferencing sessions to connect primary care medical and behavioral health providers with a multidisciplinary team of specialists to improve the quality of care and clinical outcomes for underserved children and adolescents. During each 90-minute session, the specialist team delivers educational presentations on key issues in pediatric health including asthma management, genetic screening, obesity, diabetes, suicide/self-harm, autism, and cardiology, and provides recommendations on challenging cases posed by participants.

Providers and care team members across New England are eligible to register for free for just this session or the full 9-month program.
